

## Face-age-gender-ideas

借鉴 C3AE 的思路，以及 LFFD 的思路，对人脸检测时，加宽框距，将图片输入网络一次，而不是像 C3AE 一样输入 3 次，同时，融合浅层信息和深层信息，综合判断。

Drawing on the ideas of C3AE and LFFD, when detecting faces, widen the frame distance and enter the picture into the network once instead of 3 times like C3AE. At the same time, it integrates shallow and deep information to make a comprehensive judgment.
